

THE COTSWOLD GROUP

Asking the hard questions

Tracing

The Cotswold Group employs a specialist Tracing team whose personnel, consisting of both office Case Managers and Field Agents are, dedicated solely to dealing with large volume tracing and status enquiries.

These dedicated teams are supported by our Research department where required and use a full range of commercial databases.

By utilising only employed staff we provide greater control and peace of mind to our customers. As part of our business model, we provide out of hours cover as standard with this service, which we believe offers a demonstrably greater degree of success when compared with a traditional 9 to 5 offering.
